

"It Hits the Spot!"

You can feel certain of GOOD bread, biscuits, and pastries when made of PERFECTION FLOUR.

No doubts—no worries—no disappointments. Long ago, we realized that some day there would be a demand for better flour, for a dependable flour. The demand is here—the flour is here, it is

PERFECTION FLOUR

Our Absolute GUARANTEE

Order a sack of Perfection Flour. Give it a thorough trial, use all you want to from the sack. If you do not find it satisfactory for any reason, if you are not able to obtain better results, take the remainder of the sack of flour back to your grocer. He is authorized to return your money without a word.

The Kaw Milling Co.
TOPEKA, KANSAS

KANSAS SOAKED

Chinch Bugs Checked and Wheat Beginning to Head.

Early Planted Corn Is Making Satisfactory Growth.

Weather and crop conditions in Kansas for the week ending May 25, 1915, are set forth in the following report by the local weather bureau:

Rains fell on more than half the days this week and thoroughly soaked the ground in all parts of Kansas. The weekly totals generally ranged from 2 to 4 inches in the western half of the state and from 3 to 6 inches in the eastern. Destructive hail occurred locally in the Kaw valley near Manhattan and in Decatur county on the 23d and serious overflows were general along the Neosho and Verdigris rivers and the Arkansas below Wichita. In the northwestern part of the state there was freezing weather and snow which amounted to an inch and a half in some counties the first half of the week, but the damage done was comparatively slight. All farm work was brought to a standstill by wet fields. In the western counties the excessive moisture was beneficial, but in the eastern sunshine and warm, drying weather were badly needed.

Wheat is beginning to head in all parts of the state. The week was too wet and cool for it in the eastern half, but the heavy rains checked the chinch bugs effectively. Damage from fly, which is worst in the eastern counties, has not increased noticeably this week and the general outlook is very satisfactory in the central part of the state and exceptionally good in the western counties except the more northwestern, where

the freezing weather damaged it to some extent.

Planting and cultivating corn were at a standstill all week. Some planting remains to be done in all counties and considerable of the late planted will have to be replanted. The early planted has made a satisfactory growth.

Much alfalfa had been cut and taken up in the eastern half of the state before the rains began this week, but there was also a great deal that was still down and practically ruined. The oats crop is in excellent condition except in some southeastern counties.

Gardens and potatoes are growing nicely, but need more sunshine.

The Country at Large.

Washington, D. C., May 26.—In the winter wheat belt the weather continued generally favorable during the past week for plant development and all portions of the belt now have abundant soil moisture, but the crop continues short, though it is improving south of the Ohio river. Continued fly activity is reported from Indiana, Illinois, Missouri and eastern Kansas and complaint of lodging and damage from rust in Oklahoma. In central and western Kansas, Nebraska and Texas the crop is in fine condition.

In the spring wheat states the crop is advancing satisfactorily under favorable soil conditions.

In the corn belt cool and wet weather has been generally unfavorable for germination, growth and cultivation and favored cut worm activity, considerable replanting is necessary.

Ranges, meadows, oats and truck made satisfactory progress but wetness caused considerable damage to alfalfa where harvest was in progress. Frost and freezing weather in the northern and mountain districts caused some damage to tender vegetation and fruit.

Railroad Conference in Washington.

Washington, May 27.—The conference between members of the interstate commerce commission, members of state railway commissions, and representatives of railroads begins here today.

BLAKE'S WEATHER.

"Hope springs eternal in the human breast; Man never is but always to be blest."

People expect all kinds of big crops this year, but it is based upon no foundation more solid than hope. We know for a year or more in advance what, when and where the eclipse of the sun and moon will be, and that knowledge is not based on foundation as firm as the knowledge of the astronomical bodies. The same is true of the transit of planets across the face of the sun, while the transit of the moon across the face of the sun is an eclipse of the sun. Weather does not come as mere chance based on hope, as many people suppose, but is the result of action of the heavenly bodies which can be calculated with mathematical certainty for as long in advance as an eclipse of the sun or moon. An eclipse is visible on an area as large as a continent, so is the general nature of the weather, and for the last thirty years I have correctly forecast the general nature of the weather for the United States, and the verification has not been less than 80 per cent. Each year the per cent has increased, and my knowledge of nature's law expanded till it is now about 100 per cent. But the farmer says he does not care for what the general nature of the weather will be in the United States as to whether it will be a warm or cold winter, or whether it will be a very wet or very dry crop season. What he wants to know is what the weather will be on his little farm each day in the year, and as there are many millions of farms in the United States, it would take many millions of calculations to tell him what the weather will be on each one. To each one who sends \$2 I will now send an account of the extremes for each month in detail till the end of this year. I could go further and show mathematically the exact cause of the present war in Europe, which none of the people there are aware of, but they would see the point at once after I explained it mathematically. If we calculate human force mathematically from the death of Socrates for knowing too much, till now the result will astonish the entire world.

C. C. BLAKE.

122 W. 6th St., Topeka, Kan.

LAW SCHOOL ENDS.

Big Pep Meeting Will Mark End of Term Tomorrow.

Class work for the semester at the Washburn law school will close at 10 o'clock Friday morning. A pep meeting will be held at that hour in the large freshman room and the students, faculty and alumni will attend. Each senior will be given two minutes for a talk.

The members of the class are: George Barrett, John T. Boyle, Don A. Campbell, Walter T. Chaney, Robert E. Cunningham, O. E. Eldson, Elmer E. Euwer, Earl Farrish, John M. Forbes, Ray H. Garvey, Harry C. Green, Lewis A. Hasty, Jay P. Jensen, T. Oliver Larimer, Harry R. Logan, J. Sidney Nye and Frank A. Redmond.

At the first twinge of rheumatism get from any pharmacy about four ounces of Jad Salts; put a tablespoonful in a glass of water and drink before breakfast each morning for a week. This is said to eliminate uric acid by stimulating the kidneys to normal action, thus ridding the blood of the impurities.

Jad Salts is inexpensive, harmless and is made from the acid of grapes and lemon juice, combined with lithia and is used with excellent results by thousands of folks who are subject to rheumatism. Here you have a pleasant effervescent lithia-water drink which overcomes uric acid and is beneficial to your kidneys as well.

PLACE LARGE ORDERS

Railroads Make Contracts for 52,000 Tons of Steel Rails.

Chicago, Ill., May 27.—Four railroads have placed orders for steel rails amounting to 52,000 tons, with the United States Steel corporation which is now operating at the rate of 80 per cent of its full capacity.

The largest order, for 25,000 tons of rails, came from the Southern Pacific. The New York Central, it is said, will give a steel rail order to the Illinois Steel company.

GLORY AT A BOUND

Rocketing Career of Sir Stanley Startles All England.

From Censor to "Keeper of King's Conscience" in a Day.

SEAL IS REFUSED BY SIMON

Second Man in History to Decline Woolsack.

Sir John Casts Longing Eyes on Prime Ministership.

London, May 27.—To be promoted in a day from the thankless post of director of the press bureau to "keeper of the king's conscience," from chief censor to lord high chancellor—the highest judicial position in the empire—with a salary of \$50,000 yearly and a pension of \$25,000 yearly for life, is the change which has come in the career of Sir Stanley O. Buckmaster.

Kisses King's Hand.

When he kissed the king's hand at Buckingham palace today he received the great seal turned over to the king yesterday by Viscount Haldane, who established a precedent two years ago by going to America, leaving the seal out of the hands of its authorized custodian.

The news of Sir Stanley's promotion attracted wide discussion, even in this day of startling changes due to the formation of the coalition ministry. It is understood the seal in the woolsack in the house of lords was declined by Sir John A. Simon, the new head of the home office, who preferred a political to a judicial career. His name already linked in gossip with that of David Lloyd George as a possible prime minister some day, Sir John Simon was the attorney general and his declination made way for the solicitor general, Sir Stanley Buckmaster.

Second Man to Decline It.

Sir John Simon is the second man in British history to decline the woolsack, which is the seat of the lord high chancellor as presiding officer of the house of peers, Sir Henry James, afterward Lord James, being the first. Sir Stanley Buckmaster's promotion had caused considerable adverse criticism.

It is understood Sir John Simon will assume general supervision of the press bureau, Sir Frank Bland, Sweetnam and Sir Edward T. Cook, the present assistants.

HEARING HIMSELF SING

Morton Harvey Visits the Santa Fe Watch Co. Store.

Morton Harvey, baritone singer, formerly with the Al G. Field minstrels and the maker of the Edison records "In the Hills of Old Kentucky," "There's a Little Bungalow in Dixie Land," is in Topeka arranging to go on the Orpheum circuit in a musical offering with Jack King, the tenor and pianist who appeared at the Orpheum the first half of this week.

Mr. Harvey has sung for both the Victor and Edison people. He visits the music rooms of the Santa Fe Watch company and "listened to himself" as others do, then with the accompaniment of Mr. King sang the songs he did before the big recording horns in the Edison laboratories.

The word passed round mouth to mouth that Morton Harvey was singing and soon the music rooms were well filled with the musical passers by and those luckily informed, and the big baritone fairly shook the walls with the song hits of the day. Three times he was urged to sing "When I Dream of Old Erin, I'm Dreaming of You."

When asked about making records Mr. Harvey gave an interesting explanation of the arrangement of the recording horns. He said the stringed instruments were grouped on the floor of the room, the horns often placed behind the players, and the distance between the reproducing horn and that of the musician. Other instruments are given positions on elevated stands, every feature being suitably planned to create harmony and the desired results.

It's difficult, sometimes, to determine just how one is singing," said Mr. Harvey, "when a horn booms up behind or a bird whistle in one's ear almost splits the tympanum. 'No,' he said, "not every master record is a success; often several blanks are used before a successful reproduction is made." Mr. Harvey expects to continue singing for the Edison company as soon as the plant is rebuilt and running under normal conditions. Harvey and King, in their vaudeville stunt, probably will visit Topeka again.

DRESS WARM AND KEEP FEET DRY

Tells Rheumatism Sufferers to Take Salts and Get Rid of Uric Acid.

Rheumatism is no respecter of age, sex, color or rank. If not the most dangerous of human afflictions it is one of the most painful. Those subject to rheumatism should eat less meat, dress as warmly as possible, avoid any undue exposure and, above all, drink lots of pure water.

Rheumatism is caused by uric acid which is generated in the bowels and absorbed into the blood. It is the function of the kidneys to filter this acid from the blood and cast it out in the urine; the pores of the skin are also a means of freeing the blood of this impurity. In damp and chilly cold weather the skin pores are closed thus forcing the kidneys to do double work, they become weak and sluggish and fail to eliminate this uric acid which keeps accumulating and circulating through the system, eventually settling in the joints and muscles, causing stiffness, soreness and pain called rheumatism.

At the first twinge of rheumatism get from any pharmacy about four ounces of Jad Salts; put a tablespoonful in a glass of water and drink before breakfast each morning for a week. This is said to eliminate uric acid by stimulating the kidneys to normal action, thus ridding the blood of the impurities.

Jad Salts is inexpensive, harmless and is made from the acid of grapes and lemon juice, combined with lithia and is used with excellent results by thousands of folks who are subject to rheumatism. Here you have a pleasant effervescent lithia-water drink which overcomes uric acid and is beneficial to your kidneys as well.

WOMAN DOCTOR IS HELD

Chicago Police Mystified by Shooting of Young Woman.

Chicago, May 27.—Dr. Eva S. Shaver was held by the police today to explain the shooting of her body last night of Miss Anna Johnson, who was said to have come to the physician's home from Ludington, Mich. The girl was found with a bullet wound in her head, in a room occupied by Clarence Shaver, a son of the physician, who has disappeared. W. C. Harvey, who lives at the Shaver residence and who found the body, but who, the police say, failed to notify them until several hours after the shooting, was arrested and held. A revolver owned by young Shaver was found tightly clutched in Miss Johnson's left hand. The fact that the bullet which caused death entered the right side of her head puzzled the police.

Three bullets had been fired from the weapon. Two of them were found imbedded in the wall.

DROP IN VALUATION.

Prairie Oil and Gas Shows \$5,000,000 Decrease.

Valuation of the properties of the Prairie Oil and Gas company in Kansas will this year drop from \$11,391,185 to less than six million dollars, according to estimates made by the state tax commission. Since the reorganization of the company, property valuations have been reduced in almost every county where the giant oil company has holdings.

One of the big reductions over last year's property showing is due to the drop in the price of oil. Oil in the company's tanks and in pipe lines in 1914 was assessed at 82 cents a barrel. This year the valuation dropped to 32 cents a barrel.

PROFESSOR COWDRICK.

The boast of heraldry, the pomp of power, And all that beauty, all that wealth e'er gave, Await alike the inevitable hour. The paths of glory lead but to the grave.

For the last ten or twelve years, or at least as far back as any present student of the high school can remember, a truly great man in his line of work has been the instructor, the friend, and almost the father of nearly every first-year student. Like most of the teachers in the world, few were dedicated to him by graduating classes, for this long years is a big enough trap in the life of a high school student to let him forget who it was who first gave him the incentive to attain his position. Good first-year teachers are rare, for the work is harder and the glory less, and few good teachers care to teach the sub-freshmen classes any longer than necessary. But this man stayed, he did not seek a position with more advanced students, but saw where his duty lay and did not try to avoid it.

Professor Cowdick was a great student of history. He was better read in that line than any other teacher in the high school, or in many colleges. He was a good talker and he would have undoubtedly made good on the lecture platform if he had chosen that field. He was qualified to teach history in any college in the state, but he remained with the classes he could help most, he stayed where he could do the most good, with the first-year class in the high school. —T. H. S., June, '16.

Friday Bargains!

mean Money Auerbach & Guettel

Savings at **The Palace CLOTHING CO.**

708-710 Kansas Ave.

Attention! Young Men

As a Friday Special we are offering special Young Men's Suits, very latest styles in Blue Serges and fancy patterns, including Glen Urquhart Plaid, Tartan, some of them English cut with patch pockets in the 1 and 2 button styles. KEEP LOOKING YOUNG

It's Easy—If You Know Dr. Edwards' Olive Tablets.

The secret of keeping young is to feel young—to do this you must watch your liver and bowels—there's no need of having a sallow complexion—dark rings under your eyes—pimples—a bilious look in your face—dull eyes with no sparkle.

Your doctor will tell you ninety per cent of all sickness comes from inactive bowels and liver.

Dr. Edwards' Olive Tablets, the compound mixed with olive oil to act on the liver and bowels, which he gave to his patients for years.

Dr. Edwards' Olive Tablets, the substitute for calomel, are gentle in their action, yet always effective.

They bring about that exuberance of spirit, that natural buoyancy which should be enjoyed by everyone, by toning up the liver and clearing the system of impurities.

You will know Dr. Edwards' Olive Tablets by their olive color. 10c and 25c per box. All druggists.

The Olive Tablet Company, Columbus, Ohio.—Adv.

To Make Hairs Vanish From Face, Neck and Arms

Keep a little powdered delatone handy and when hairy growths appear make a paste with some of the powder and a little water, then spread over hairy surface. After 2 or 3 minutes rub off, wash the skin and it will be entirely free from hair or blemish. This simple treatment is unfailing, but care should be exercised to be sure and get genuine delatone, otherwise you may be disappointed.—Adv.
